Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 17-18 are rejected under 35 U.S.C. 101 because the claims are directed to computer media storing nonfunctional descriptive material.

Data structures not claimed as embodied in computer-readable media are descriptive material per se and are not statutory because they are neither physical "things" nor statutory processes. See, e.g. Warmerdam, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory) and merely claiming nonfunctional descriptive material stored in a computer-readable medium does not make it statutory. (See MPEP 2106.IV.B.1.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 13-30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 5, 6, 12, 10, 11 of U.S.

Application/Control Number: 09/978,251

Art Unit: 2616

Patent No. 6,459,850. Although the conflicting claims are not identical, and that the claimed language of the present Application is somewhat different from the language recited in the patented claims 1, 5, 6, 12, 10, 11, however, they are not patentably distinct from each other because it is noted that it would have been obvious to one of ordinary skill in the art to recognize that the patented claims 1, 5, 6, 12, 10, 11, would be able to perform the functions of the claimed limitations of the present Application since the limitations recited in the claimed invention of the present Application are also recited in the patented claims 1, 5, 6, 12, 10, 11.

With regard to claim 13, Applicant's attention is directed to the patented claim 1 of U.S. Patent 6,459,850.

With regard to claim 14, Applicant's attention is directed to the patented claim 5 of U.S. Patent 6,459,850.

With regard to claim 15, Applicant's attention is directed to the patented claim 6 of U.S. Patent 6,459,850.

With regard to claim 16, Applicant's attention is directed to the patented claim 12 of U.S. Patent 6,459,850.

With regard to claim 17, Applicant's attention is directed to the patented claim 10 of U.S. Patent 6,459,850.

With regard to claim 18, Applicant's attention is directed to the patented claim 11 of U.S. Patent 6,459,850.

With regard to claim 19-30, it is noted that the feature of controlling the compression unit in accordance with the complexity for the at least a part of the

. . }

Page 4

program by increasing compression for more complex parts of the programs would be inherently present in the patented claims of US Patent 6,459,850, since the patented claims includes the feature of adjusting the encoding bit rate depending on the complexity of at least part of the program determined during the encoding. Applicant's attention is directed, for example, to the patented claim 1 of U.S. Patent 6,459,850.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bob Chevalier whose telephone number is 571-272-7374. The examiner can normally be reached on MM-F (9:00-6:30), second Monday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Groody can be reached on 571-272-7950. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
